# Pattern Card

Organize your styles, colors and fabrics with our Pattern Manager – one place to manage it all!

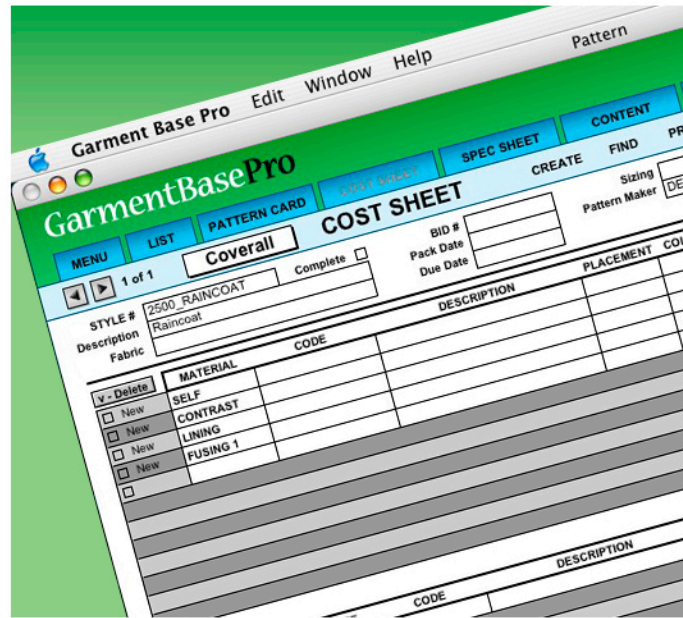

» The **Pattern** - manages all basic garment information: style number, name, fabric type, created date, and the name of the pattern maker.

» **Style #**      **Care Code**    **Modified**  
**Description**   **Pack Date**   **Due Date**  
**Fabric**        **Block #**       **Division**  
**PO #**           **Created**       **Pattern Maker**

» **Custom Fields** - These are fields that can be customized for tracking info unique to your type of garments.

# Cost Sheet

Manage your vendor costs and easily estimate production costs and quantities.

» **Cost Sheet** - Track all costs per garment.

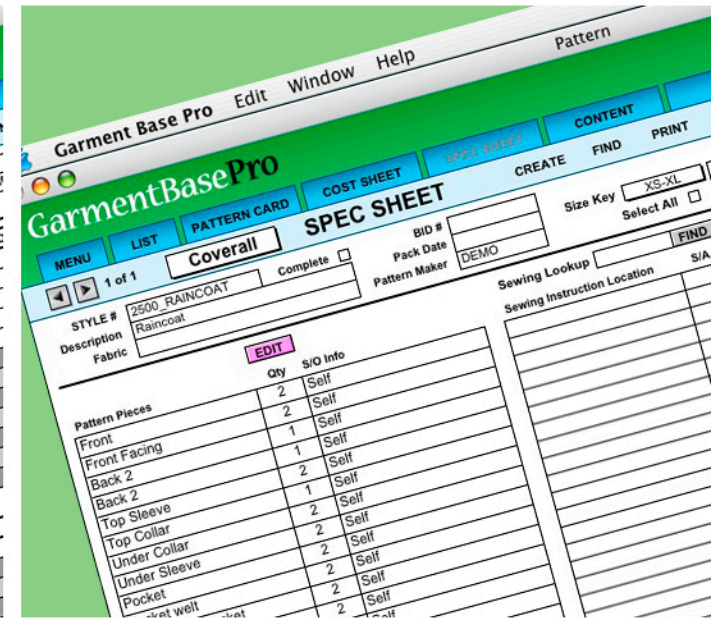

» **Materials** - Track project material costs, colors, yields, widths and placements by vendor using unique codes.

» **Trim** - Easily identify the cost of trims and extras prior to production.

» **Send Out** - Track which vendors you sub-contract pieces out to.

# Spec Sheet

Store your pattern pieces, sewing and grading information and project notes.

» **Auto-Grading** - Input your own size rules to take advantage of GarmentBasePro's auto-grading feature.

» **Pattern Pieces** - This information can be entered manually or imported using the PAD Pattern import function on the Main Menu.

» **Sewing Lookup** - The lookup function is used to copy the sewing information from one style to another to save time!
